Syrian shifting sands

Egyptian press

Syria is in a league of its own as far as the Arab Spring is concerned. Every attempt to reach the country’s democracy crisis has failed so far. Despite increased violence, the Syrian regime steadfastly clings to power. The protest movement is too weak to force the resignation of President Bashar al-Assad. Syria’s economy is on the brink of collapse, with inflation soaring and unemployment reaching record levels. The situation in Syria is dire, and the international community continues to watch the situation unfold with concern.

Egypt

Thank the Democrats

Mr. Obama is not a fool. He has realized that what would happen if he helped ousted Egypt’s dictator Hosni Mubarak. Unfortunately, the Egyptian army, led by General Abdel Fattah el-Sisi, now absolute power. The military council has declared a three-month state of emergency, and internet access has been cut. The Egyptian government has arrested hundreds of protesters, journalists, and political activists. It is a dangerous time for Egypt, and the United States should not be complacent. This is a pivotal moment in the country’s history, and we must support those fighting for democracy and human rights.
